

GRAPHICS PRINTING MANUFACTURE

Items to be supplied on CD

Files in Xpress 6.0, Illustrator or Indesign CS2 format.

Format

The image supplied should be one third of the size of the final graphic and there should be no margins or marked cutting edges. We will make arrangements for the addition of hems.

Supplying your files

- All images should be supplied in CMYK, with a resolution of between 300 and 450 DPI.
- Logos and vector line drawings can only be accepted in Illustrator.

Fonts

- All font sets must be provided (both screen and printer fonts used in your files).
- Remember to include the fonts used in your Illustrator files for imported text (if these are not vectorised).

Checking your file

Check your file by printing the graphic in colour. If you are using Pantone colours or equivalent, please provide their names.

Usable graphics format

//// Hems

50 mm will be added to the top and bottom of your design to allow for the required hems (40 mm + 10 mm for stitching)

Maximum weight of graphic : 450g per sq.m
